## **Tactair Introduces Product Improvement to Bell 206L, L1-L4 Hydraulic Servo Actuator**

**Heli-Expo 2014 – Anaheim, California** – Tactair, a leading designer, manufacturer and supplier of fluid power and motion control products and systems, has introduced an improvement to the Tactair (Ronson/Kaiser) HSA for the Bell 206 L,L1-L4 Helicopter. The improvement replaces the existing Cylinder Extension Assembly with a new, upgraded component that has been designed to increase reliability and service life of the HSA. This product improvement is a part of Tactair's constant effort to provide support for its products in the field.

The Service Bulletin outlining the improvement is available on [www.bellcustomer.com](http://www.bellcustomer.com) under 'Technical Bulletins'.

Tactair Fluid Controls Inc. is a subsidiary of Young & Franklin Inc. of Liverpool, New York. Tactair designs and manufactures fluid power and motion control products for brake, landing gear, nose wheel steering, flight control, engine/nacelle control and utility control systems for fixed and rotary wing aircraft, naval service vehicles and land combat vehicles.
