Tactair Hardware Flies on Embraer Legacy 500

Paris Air Show, Le Bourget...Tactair Fluid Controls (*Hall 3A. Stand 117A*) a leading designer, manufacturer and supplier of fluid power and motion control products and systems has delivered flight test hardware to support the Legacy 500 flight test program.

Tactair supplies Heroux Devtek with the main and nose landing gear uplocks and downlock release actuators for the Legacy 500 and 450 landing gear.

Tactair Fluid Controls Inc. is a subsidiary of Young & Franklin Inc. of Liverpool, New York. Tactair designs and manufactures fluid power and motion control products for brake, landing gear, nose wheel steering, flight control, engine/nacelle control and utility control systems for fixed and rotary wing aircraft, naval service vehicles and land combat vehicles.
